

# DATALUX.NEXTGEN

## FIXTURES: NEXTGEN

- NEXTGEN offers more light per linear meter combined with completely new optics. This results in fewer fixtures required while still ensuring the perfect lighting experience and high uniformity across the fixtures. In the end, guaranteeing significant material and energy consumption savings.
- The mechanical and electrical connection between the fixtures can be accomplished in just one mounting step. This so-called plug-and-play principle has been remarkably improved.
- The electrical connection is made by employing industrial WAGO connectors.
- The mechanical locking is accomplished by a completely new developed U-clip. Aligning and mounting the fixtures hereby has become even simpler.
- Expected LED lifespan: up to 100,000 burning hours.

## Features

### Mechanical

Material housing	Polycarbonate (UV stabilized)
Material connects	Recycled nylon
Material profile	75% Recycled aluminium
Nominal diameter fixture	60 mm
Dimensions	3,45 m / 2,33 m
Temperature range	-25 °C – +40 °C
Water, dust and impact resistance	IP65 / IK10

### Electrical

Input voltage	230 Vac, 50 Hz, PF >0,98
Connections	3 phases / Emergency / DALI-2

### Optical

CRI	>84
Color quality	3 step

## FIXTURES: NEXTGEN DC

### DALI-2

### Central emergency

- These fixtures are perfectly combinable with the most conventional emergency lighting solutions but without the advanced DALI-2 control system.
- Luminaid can install the fully certified emergency lighting solutions in the fixtures and accordingly deliver them ex-factory.

## FIXTURES: NEXTGEN DD

### DALI-2

### Decentral Emergency

- DATALUX.NEXTGEN also has two variants regarding integrated decentralized emergency lighting solutions which include;
- A variant integrated into the fixture (Extension .E).
- A variant in the form of easily integratable separate emergency lighting fixtures which is not controllable via the DALI-2 protocol.
